PRESENTS

“Developing Recipes for Operational Success”

Featuring

Fireground Scenarios, Case Studies and Panel Discussion

This one day interactive workshop will include several, computer generated fireground scenarios (based on real life incidents), where attendees will be able to participate in the problem solving. The following scenarios will be included:

- Single Family Dwelling Fires
- Multiple Family Dwelling Fires
- Commercial Building Fires (Strip Mall)
- Residential High-Rise Fires

A diverse panel of fire service experts will provide advice and guidance to participants on proper fireground strategy and tactics for the various problems. Throughout the day, Firenuggets Associates will help facilitate the discussion, with the attendees choosing the various topics and overall direction of the discussion. All attendees will be invited to ask questions, express their respective opinions, and steer the discussion in whatever direction they desire.

Attendees will leave with several new recipes to handle the various emergencies they encounter. Ultimately, the diverse knowledge gained will help all attendees achieve improved firefighter safety and overall operational success.

LOCATION	COST	DATE and TIME
